ENABLING A VIRTUAL CLASSROOM FOR ALL STUDENTS  
—WHEREVER THEY ARE.

The future of education is here. Though it looks nothing like we thought it would, it's filled with more possibilities than ever as opportunities for learning expand beyond the classroom walls.

With Lenovo and Microsoft, schools can ensure that learning never stops, no matter where students and teachers happen to be. Lenovo Windows 10 devices boast all-day battery life and are designed to help students and teachers stay connected to each other and to the cloud.

Our tablets, 2-in-1s, laptops, and other education devices are designed and tested to withstand the bumps, drops, spills, and everyday wear and tear that can occur in learning environments ranging from the classroom to the kitchen table.

When you bundle Lenovo Windows 10 devices with our distance learning software suites, you have an unbeatable combination of built-in security and privacy features plus student monitoring and remote classroom management tools, professional development resources, and more.

Lenovo Windows 10 devices combine 720p self-facing and 5mp world-facing cameras with Office 365 Education collaboration tools like Microsoft Teams, a secure platform for helping students and teachers collaborate and connect from school and home.

Students can use Lenovo Windows 10 devices to learn to code, live stream, collaborate virtually, and more, developing critical future-ready technology skills that will carry with them into tomorrow's workplace.

Lenovo Windows 10 devices offer improved accessibility for learners of all abilities, including facial recognition log in, enhanced touch and pen capabilities, and inclusive collaboration tools through Office 365 Education.

We are all navigating the future of education together. If you are struggling with where to begin or how to affordably support students and teachers with the best resources for enabling a virtual classroom at school and at home, we can help.

Talk to your Lenovo representative today to start building collaborative classrooms and helping teachers connect in professional learning communities with Lenovo Windows 10 devices and Office 365 Education, which includes Microsoft Teams and is free for you entire school.
